

# Biodiversity Observations

<http://bo.adu.org.za>

**An electronic journal published by the Animal Demography Unit at the University of Cape Town**

The scope of Biodiversity Observations consists of papers describing observations about biodiversity in general, including animals, plants, algae and fungi. This includes observations of behaviour, breeding and flowering patterns, distributions and range extensions, foraging, food, movement, measurements, habitat and colouration/plumage variations. Biotic interactions such as pollination, fruit dispersal, herbivory and predation fall within the scope, as well as the use of indigenous and exotic species by humans. Observations of naturalised plants and animals will also be considered. Biodiversity Observations will also publish a variety of other interesting or relevant biodiversity material: reports of projects and conferences, annotated checklists for a site or region, specialist bibliographies, book reviews and any other appropriate material. Further details and guidelines to authors are on this website.

Lead Editor: Arnold van der Westhuizen – Paper Editor: Les G Underhill

## PROJECT REPORT

### REPORT ON THE SPRING LEPIBASH FOR LEPIMAP, 15–23 OCTOBER 2016

Megan Loftie-Eaton

Animal Demography Unit, Department of Biological Sciences,  
University of Cape Town, Rondebosch, 7701 South Africa

#### INTRODUCTION

LepiMAP is the Atlas of African Lepidoptera. It is the continuation of the project known as SABCA (Southern African Butterfly Conservation Assessment), which produced the atlas and Red List for butterflies in South Africa, Lesotho and Swaziland (Mecenero et al. 2013). LepiMAP extends the taxonomy to both butterflies and moths, and extends the area under consideration to Africa. LepiMAP is a joint initiative of the Lepidopterists' Society of Africa and the Animal Demography Unit in the Department of Biological Sciences at the University of Cape Town.

The LepiMAP project has held LepiBASH events twice a year, over a nine-day period from a Saturday to the following Sunday, during the southern autumn and spring. The 2016 Spring LepiBASH ran from Saturday, 15 October to Sunday, 23 October. Even though this event was labelled the Spring LepiBASH, it did focus on the whole of Africa and welcomed any butterfly or moth records from across the continent. The LepiBASH events are drives to increase the amount of data coming into the LepiMAP database. This is the first time a LepiBASH has produced a formal report.

The LepiBASH also featured on Radio Today as part of the Sappi Nature Journal Programme. Listen to the interview with Tim Neary:

[http://internal.adu.org.za/upload/uploads/Megan-Loftie-Eaton-and-Lepibash\\_2016-10-22.mp3](http://internal.adu.org.za/upload/uploads/Megan-Loftie-Eaton-and-Lepibash_2016-10-22.mp3).

#### RESULTS

##### Numerical

During the nine days of the Spring LepiBASH, a total of 85 observers participated and a total of 2080 records were submitted. As an exception, 386 of these records were submitted after the official LepiBASH period because one of the observers had internet connection problems during the LepiBASH and she could only upload her records afterwards.

Three LepiMAPpers submitted more than 200 records, and the smallest number of records submitted to be part of the top 10 was 45 (Table 1). The person who submitted the most records on each of the nine days was nominated LepiBASHer of the Day (Table 2, Figures 1 and 2).

*Table 1. The numbers of records submitted by the top 10 LepiMAPpers for the October LepiBASH*

	<b>Name</b>	<b>Records</b>
1	Toy Bodbijn	386
2	Vaughan Jessnitz	383
3	Altha Swiegers Liebenberg	287
4	Rick Nuttall	87
5	Bernardine Altenroxel	83
6	Steve Woodhall	77
7	Sudheer Kommana	68
8	Quartus Grobler	66
9	Riëtte Griesel	48
10	Mary Ellen Lindsay	45

Table 2. The LepiBASHer of the Day for each of the nine days of the October LepiBASH. This was the person who had submitted the most records on the day

Day	LepiBASHer of The Day	Number of Records
1	Altha Liebenberg – Northern Cape	66
2	Sudheer Kommana – Tanzania	68
3	Altha Liebenberg – Northern Cape	63
4	Riëtte Giesel – Free State Province	18
5	Mary Ellen Lindsay – KwaZulu-Natal	14
6	Fanie Rautenbach – Western Cape	7
7	Vaughan Jessnitz – Limpopo Province	237
8	Dawie De Swart – Free State Province	24
9	Rick Nuttall – Free State Province	84

Figure 2. Altha Liebenburg, Danielskuil, Northern Cape, was LepiBASHer of the Day 3 of the October 2016 LepiBASH; she has also submitted the most records on Day 1 (Table 2)

Figure 1. Sudheer Kommana, from Tanzania, was LepiBASHer of the Day for Day 2 of the October 2016 LepiBASH (Table 2)

During the LepiBASH week, LepiMAP received records from 13 African countries, the most countries for a LepiBASH to date (Figure 3): Botswana, Côte d'Ivoire, Ghana, Kenya, Malawi, Mauritania, Mozambique, Namibia, Senegal, Swaziland, Tanzania, Zimbabwe and South Africa. The country, outside of South Africa, for which the most records was Tanzania (68 records).

The first records ever submitted to LepiMAP from Senegal were made during the LepiBASH. Figure 4 shows one of these first records from Senegal, a Painted Lady photographed by Dieter Oschadleus in Dakar while he was attending the Pan-African Ornithological Congress there.

Figure 3. Countries for which LepiMAP records were submitted during the October 2016 LepiBASH. Southern Africa: Botswana, Malawi, Mozambique, Namibia, South Africa, Swaziland and Zimbabwe. Eastern Africa: Kenya and Tanzania. Western Africa: Côte d'Ivoire, Ghana, Mauritania and Senegal.

Figure 4. LepiMAP record 605524, a Painted Lady *Vanessa cardui* submitted from Dakar, Senegal, by Dieter Oschadleus.

For South Africa, we received records from all nine provinces (Figure 5). The most records came from KwaZulu-Natal (636), followed by Limpopo (468), and in third place was the Northern Cape (323). We received the fewest records from North-West Province (9).

### Species discoveries and interesting records

Of the 2080 records received, 854 had already been identified at the time of producing this report, covering 295 taxa of Lepidoptera (Appendix 1). 1140 of the records were moths, 721 were butterflies and 219 records await classification. A big thank you goes to Fanie Rautenbach, Quartus Grobler, Steve Woodhall and Sonja Maartens for doing the bulk of the identification for October 2016 LepiBASH.

Figure 5. The distribution of the October 2016 LepiBASH records in South Africa, Lesotho and Swaziland. The shaded quarter degree grid cells had records submitted from them.

The species with the most records was the Painted Lady; 29 records were submitted (Appendix 1). After that was the Common Meadow White *Pontia helice helice* with 21 records.

Of the records that have been identified, five are of Red List species. One record is of a Trimen's Opal *Chrysoritis trimeni*, listed as Vulnerable, photographed by Dave Maguire in McDougalls Bay near Port Nolloth, Northern Cape Province, in quarter degree grid cell

(QDGC) 2916BD: <http://vmus.adu.org.za/?vm=LepiMAP-605572>. We have records for this butterfly from this locality as far back as 1968.

Steve Woodhall, Kevin Cockburn and Barry Symons submitted a record of the Vulnerable Estcourt Blue *Lepidochrysops pephredo* for grid cell 2929BB near Estcourt, KwaZulu-Natal Province: <http://vmus.adu.org.za/?vm=LepiMAP-606745>. The Estcourt Blue was first recorded in this grid cell in 1889 by C.W. Morrison.

From the same locality, we received one record of a Dingaan's Widow *Dingana dingana*, listed as Vulnerable, photographed by Steve Woodhall: <http://vmus.adu.org.za/?vm=LepiMAP-606741>. There is a LepiMAP record for Dingaan's Widow from grid cell 2929BB dating back to 1868, a specimen collected from Malanspruit, near the town of Estcourt, KwaZulu-Natal.

We received two records from grid cell 2430AA of the Endangered Lotana Blue *Lepidochrysops lotana*, photographed by Vaughan Jessnitz in Lekgalameetse Nature Reserve, south of Tzaneen, in Limpopo Province: <http://vmus.adu.org.za/?vm=LepiMAP-606412> and <http://vmus.adu.org.za/?vm=LepiMAP-606413>. We have only 35 records of this butterfly in the LepiMAP database from various localities in the mountains of eastern Limpopo Province

On each of the nine days of the Heritage Hunt, a record of interest was selected from those that had been submitted, and become the Record of the Day (Table 1, Figures 4 and 5). This was posted to the LepiMAP Facebook page (<https://www.facebook.com/LepiMAP>) and shared from there to other Facebook pages, groups and timelines, as appropriate. The motivations for the selection of each of the nine Records of the Day is presented in Table 1. There are also links to these records in the Virtual Museum.

Table 2. The records highlighted as interesting records on each day of the October 2016 LepiBASH. The link to the record in the LepiMAP section of the ADU Virtual Museum is also provided.

Day	LepiMAP observer	Motivation	URL of record in Virtual Museum
1	Graeme Young	A wonderful representation of the diversity among moths	<a href="http://vmus.adu.org.za/?vm=LepiMAP-605243">http://vmus.adu.org.za/?vm=LepiMAP-605243</a>
2	Dieter Oschadleus	Our first ever record from Senegal (Figure 2)	<a href="http://vmus.adu.org.za/?vm=LepiMAP-605382">http://vmus.adu.org.za/?vm=LepiMAP-605382</a>
3	Bart Wursten	We want moth records from anywhere in Africa	<a href="http://vmus.adu.org.za/?vm=LepiMAP-605630">http://vmus.adu.org.za/?vm=LepiMAP-605630</a>
4	Riëtte Griesel	Riette put in a lot of effort to find one of these butterflies – a Barber's Ranger <i>Kedestes barberae</i> (Figure 6)	<a href="http://vmus.adu.org.za/?vm=LepiMAP-605719">http://vmus.adu.org.za/?vm=LepiMAP-605719</a>
5	Andrew and Heather Hodgson	It serves as a good reminder to all LepiMAPpers that you can upload photos of caterpillars to LepiMAP too	<a href="http://vmus.adu.org.za/?vm=LepiMAP-605732">http://vmus.adu.org.za/?vm=LepiMAP-605732</a>
6	Jerome Ainsley	Jerome writes: "in Sandton [Gauteng Province] there are suddenly more butterflies flying around after some good soaking rain in the last couple of days. Some flying ants are emerging, and swallows and swifts are having a fine feed"	<a href="http://vmus.adu.org.za/?vm=LepiMAP-605863">http://vmus.adu.org.za/?vm=LepiMAP-605863</a>
7	Quartus Grobler	Quartus is a valued member of the LepiMAP expert panel, he also submits records to LepiMAP regularly	<a href="http://vmus.adu.org.za/?vm=LepiMAP-605889">http://vmus.adu.org.za/?vm=LepiMAP-605889</a>
8	Anthony Archer	Tony put in a lot of effort to find some butterflies to photograph in the dry North-West Province, on Day Eight he finally found one! It is an Orange Tip <i>Colotis evenina evenina</i>	<a href="http://vmus.adu.org.za/?vm=LepiMAP-606317">http://vmus.adu.org.za/?vm=LepiMAP-606317</a>
9	Lia Steen	Lia's record from Kenya serves as a reminder that LepiMAP is mapping the butterflies and moths from all over Africa (Figure 7)	<a href="http://vmus.adu.org.za/?vm=LepiMAP-606625">http://vmus.adu.org.za/?vm=LepiMAP-606625</a>

Figure 6. Record of the Day for Day 4 of the October 2016 LepiBASH (see Table 2)

Figure 7. Record of the Day for Day 8 of the October 2016 LepiBASH (see Table 2)

## ACKNOWLEDGEMENTS

We would like to thank the amazing citizen scientists, the BioMAPpers, for their enthusiasm and contributions towards biodiversity conservation in Africa. A big thank you also goes to the LepiMAP expert panel for all their hard work and the many hours they put into identifying the LepiMAP records; this is non-glamorous behind-the-scenes work, but crucial for the success of LepiMAP. We are grateful for the support of the Lepidopterists' Society of Africa (LepSoc). And last but not least, a massive thank you to Rene Navarro, the ADU Virtual Museum data systems manager and superhero, for always making sure that the Virtual Museum runs smoothly.
